

Tersus Suite Release (V1.1.5.1)

Dec 9, 2021

Overview

Tersus GNSS Inc. ("Tersus") is glad to release Tersus Suite Tool. It is available for download at <u>www.tersus-gnss.com/software/david-receiver</u>.

Tersus Suite contains some useful tools, including

1) Tersus GNSS Center (version:1.1.5.0)

It's a PC tool that helps users configure the board and visualize the board running status. This software can help to improve user experiences about TERSUS products.

2) TesusUpdate (version:3.1)

This tool is used to update the firmware of David and Tersus BX OEM board.

3) TersusDownload (version:1.2)

This tool is used to download the files which stored in the emmc of David and Tersus BX OEM board.

4) TersusRinexConverter (version:4.6)

It's a standalone convert tool which can help users convert their binary observation data (Selecting by Tersus OEM boards) into RINEX 2.10 or RINEX 3.2 format. RINEX is short for receiver independent exchange format, which is popular for post data process.

5) Tersus GeoPix (version:2.0.1.1)

Tersus GeoPix integrates the functions of GNSS observation post processing, Event Mark interpolation and geotagging in EXIF. By clicking one button after input all necessary data, the software will provide the result directly as input for image processing software.
